

QualityLink

The Quality-Link Project: Towards Open Standards for Quality Information and Recognition

Jochen Ehrenreich (DHBW) &
Colin Tück (KIC)

EDEN Annual Conference, 17 June 2024

Current challenges

Hard/impossible to
match courses
across different
platforms

Even basic course
data is often not
published in
structured form

Some data (student
ratings, recognition
history, ...) rarely
published at all

Current challenges

Quality
certifications
mostly not awarded
as digital labels

Limited examples
of information
shared using open
data standards

Directories rarely
use information
from external
services

Objectives & Values

- empower stakeholders
- provide comprehensive and relevant quality data
- create open and interoperable standards
- promote a seamless environment to use data

Quality

Competition

Student-centric approach

Transparency

Openness and inclusivity

Democratise access to quality data

Our Roadmap

- 
- Quality domains and indicators
 - Indicator ranking with students and other stakeholders
- 
- Standards Consultation Board
 - Technical standards:
 - course identification
 - basic trusted metadata
 - publication of quality data
- 
- Testing of the proposed standards
 - Prototype platform

Quality Domains and Indicators

- 1) Content Relevance, Labour Market Demand and Accuracy
- 2) Teaching Methods and Pedagogy
- 3) Accessibility and Inclusivity
- 4) Learner-Centred Approach, Satisfaction and Success
- 5) Institutional Reputation

Level of similarity of micro-credential skills/learning outcomes with those identified in forecasts (numeric scale)

The ratio of students per academic staff (numeric)

Ratio of students from a disadvantaged socio-economic background (numeric)

Grade distribution table, following ECTS Users' Guide practices (numeric)

HEIs that have recognised the micro-credential, e.g. towards a larger degree programme (numeric, list + links)

Honey Bee Health (Apiculture)

i Definition

i Disclaimer

Title	Honey Bee Health (Apiculture)
Outcomes	<p>Identify current parasites of honeybees in Ireland and more widely, considering potential threats to honeybee health from imported bees and other products.</p> <p>Describe the life cycle of the main honeybee pathogens.</p> <p>Explain the importance of plants to honeybee health.</p> <p>Link the diversity of microbes associated with honeybees with their influence on honeybee health.</p> <p>Discuss human-mediated factors involved in decline of honeybee health.</p>
Level (EQF/QF-EHEA) i	6
Language(s) of instruction	English
Costs (fee)	500 EUR
Accurate and up-to-date information: learning outcomes in ESCO ontology	No (ESCO skills generated) i

Short description of QualityLink

QualityLink aims to address all stakeholders' needs by furnishing them with all relevant information about courses and micro-credentials from a diversity of sources to improve recognition decisions and allow learners to follow flexible learning pathways. To make sure that the standards are of high quality and have ownership in the community, the consortium will create a Standards Consultation Board – a group of higher education interoperability experts from across different countries. Through creating open standards and collaboration, the project aims to establish the infrastructure for aggregating quality information from a wide range of sources.
