QualityLink

# Creating an Open Ecosystem for Quality Data

W3C Verifiable Credentials for Education Task Force  
19 May 2025

Colin Tück (KIC)

## Challenges we tackle:

Diversity of micro-credentials and other short courses

Other data (ratings, recognition history, certifications, ...) rarely published using open standards

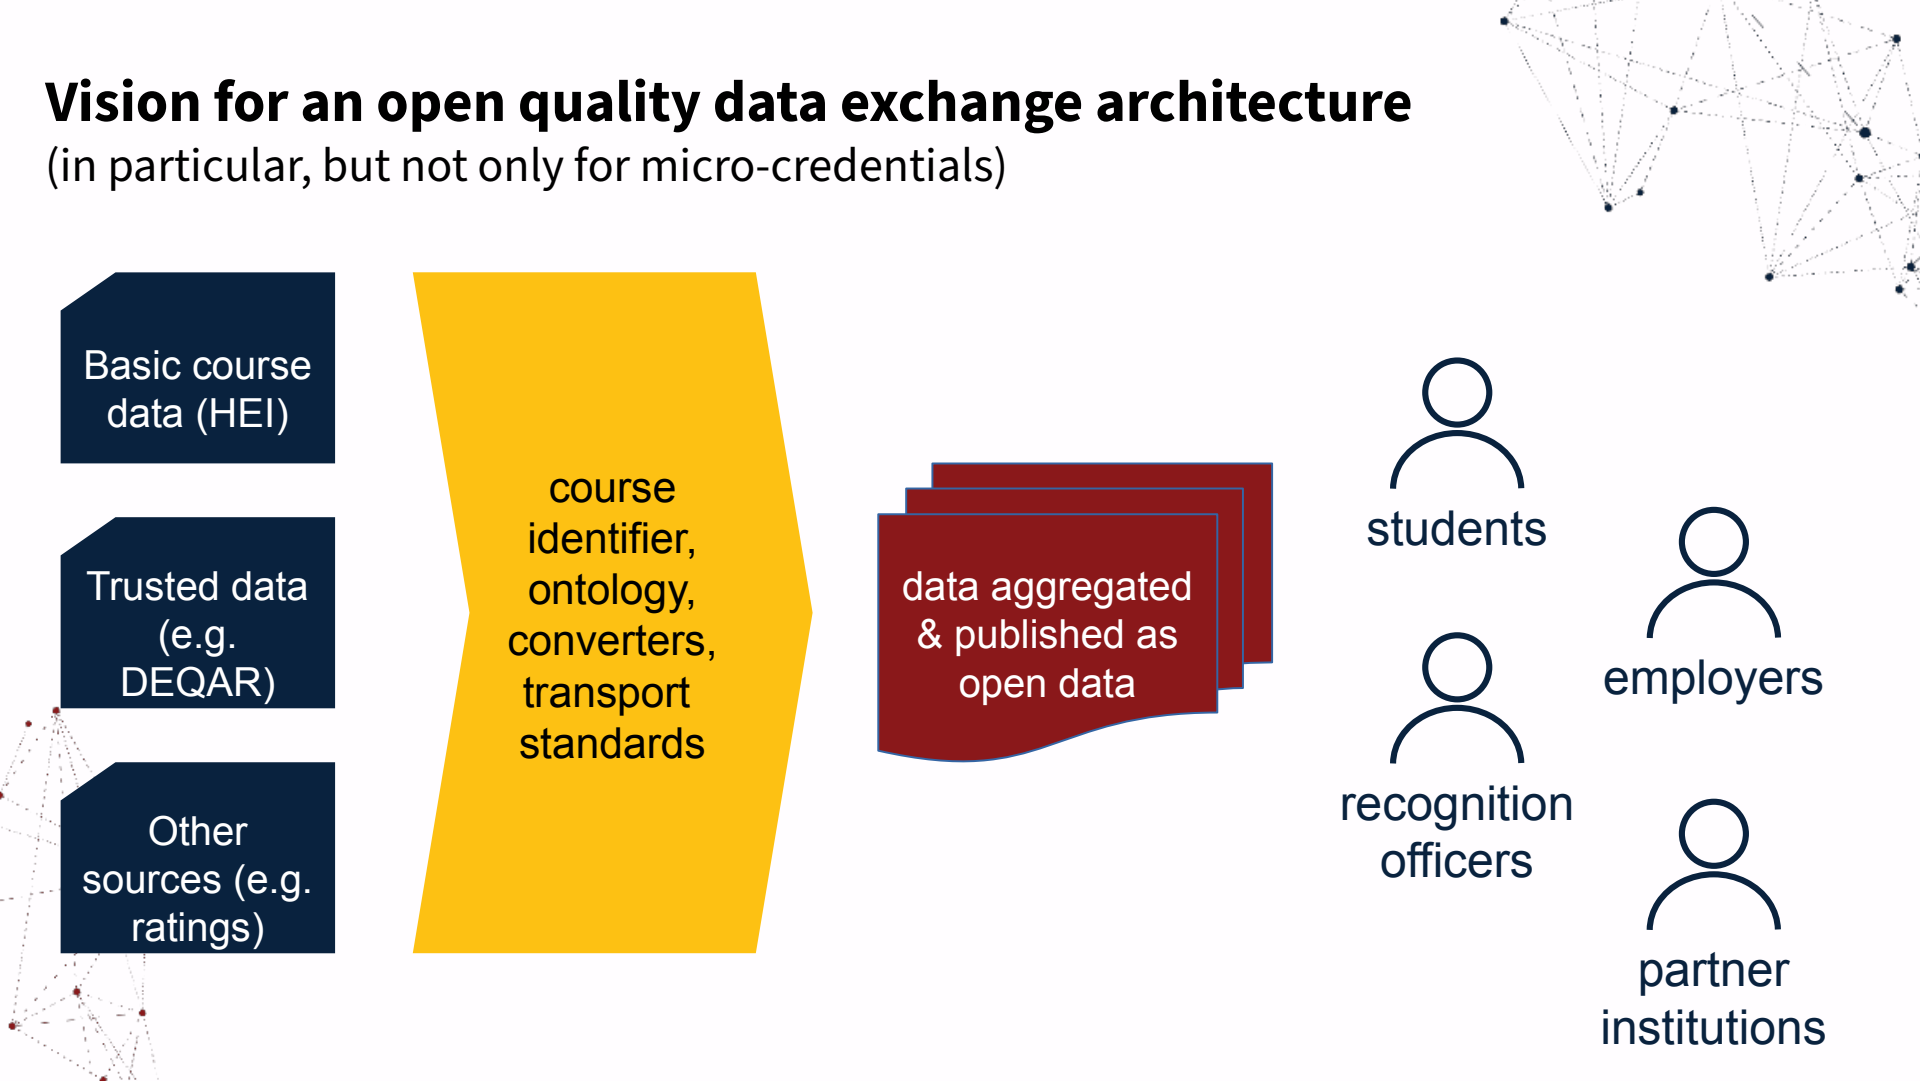

Basic course data often not published in open & structured form

Erasmus+ project running Dec 2023 – May 2026 | Partners:

# Vision for an open quality data exchange architecture

(in particular, but not only for micro-credentials)

## Use cases

Potential learners,  
guidance

Recognition and  
labour market

Alliances' joint  
catalogues

Mapping and  
benchmarking

Interoperability for  
other apps

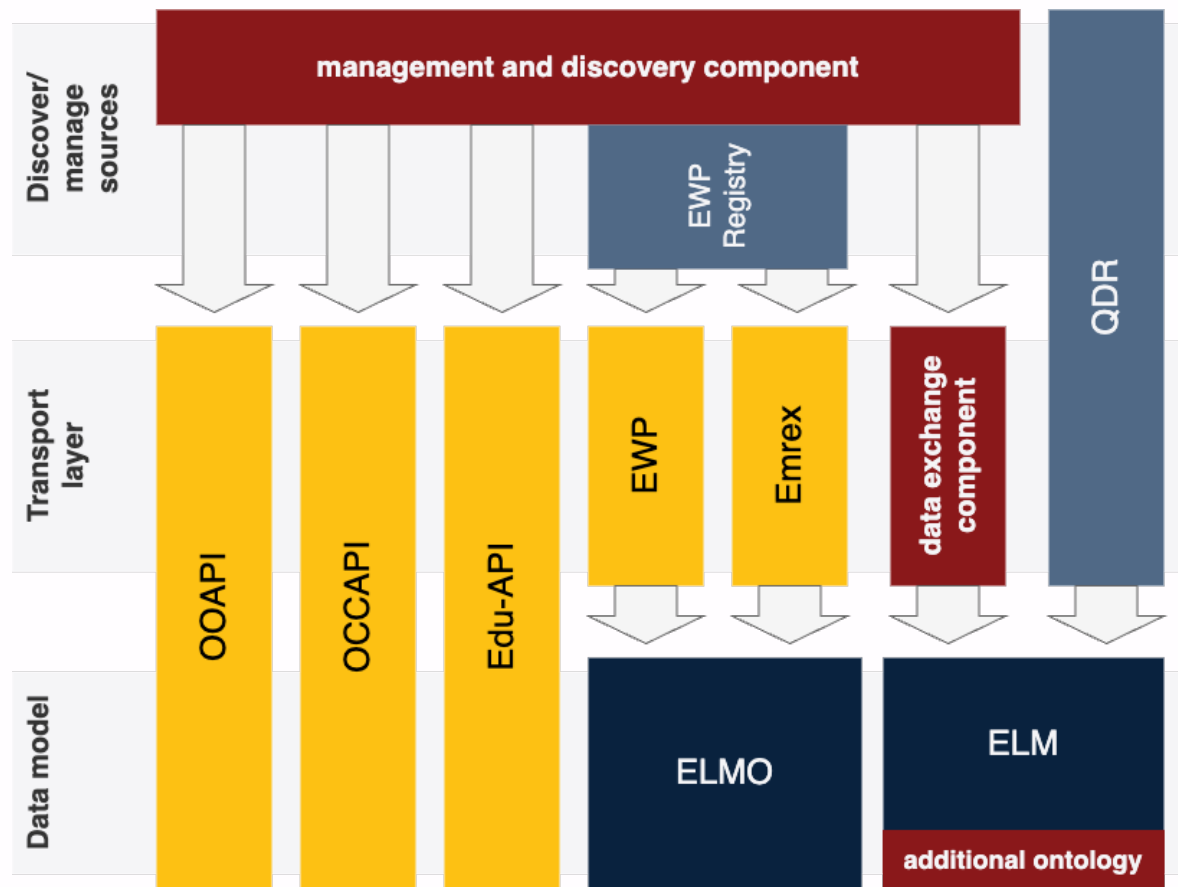

Europe-wide  
visibility

- Integrate seamlessly with existing standards/systems
- Ensure a low bar to adoption by HEIs
- Create flexibility (e.g. different routes) where helpful
- Open to future extensions (e.g. additional types of data)
- Any new components released open source

# Architecture - high level overview

# Landscape of data standards used in Europe

Standard	Maintained by	Used by	Tech
ELM	EU	EDC, QDR	RDF ontology & profiles
ELMO	EMREX	EWP, EMREX	XML schema
OOAPI	SURF	Dutch HEIs, European alliances	REST API
OCCAPI	EUF	Some HEIs	REST API
Edu-API	1EdTech	Various	REST API

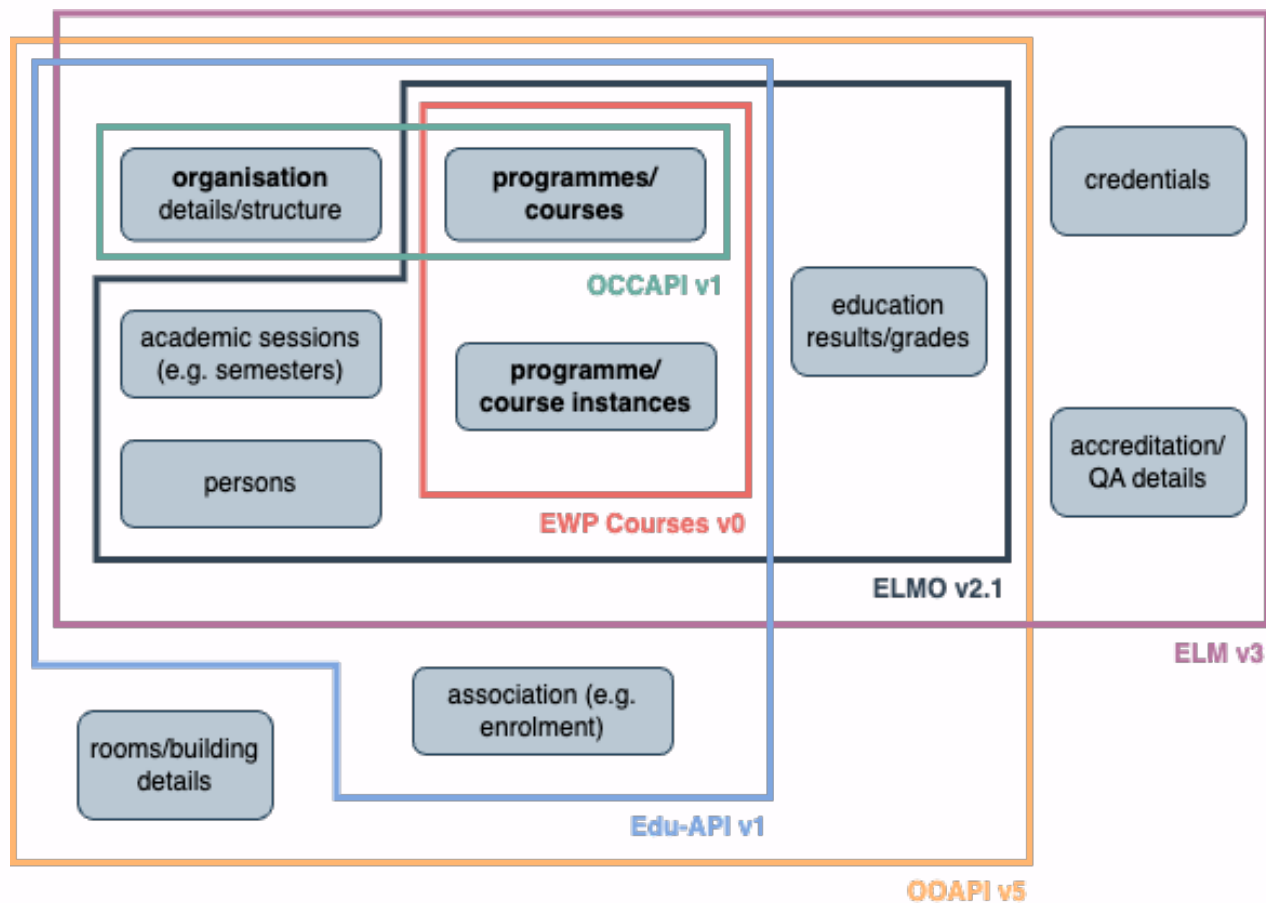

DEQAR

EQAR

EQAR & QA agencies

REST API

# Coverage of information domains

# Terminology used

General	Learning opportunity specification <i>Permanent, usually with a stable set of learning outcomes and credits</i>	Learning opportunity instance <i>Offering in a specific year or semester, or at specific location</i>
ELM	Learning Achievement Specification	Learning Opportunity
ELMO	Learning Opportunity Specification	Learning Opportunity Instance
OOAPI	Program / Course / Component	P/C/C Offering
OCCAPI	Programme / Course	(not covered)
Edu-API	Collection / Course / Component Template	C/C/C Offering
DEQAR	Programme	(not covered)

# Using DESM for mapping

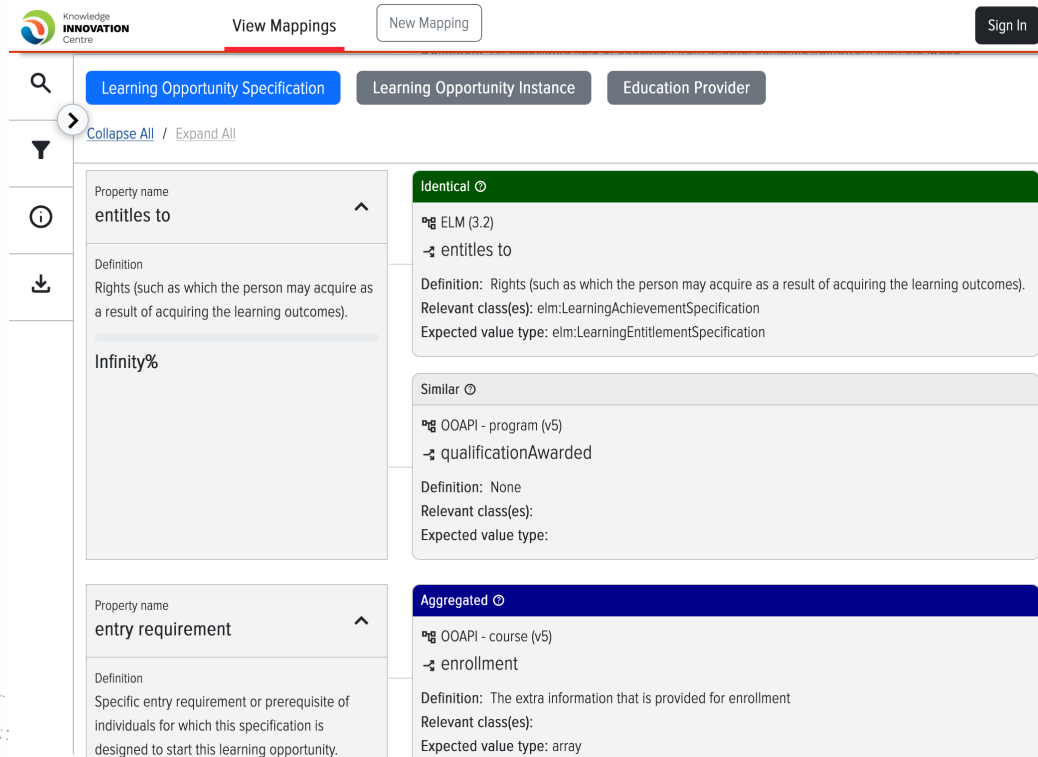

<https://mappings.skilldata.info/mappings-list?cp=4>

## Benefits:

- Good user interface
- Browse and filter properties
- Scales well to many standards

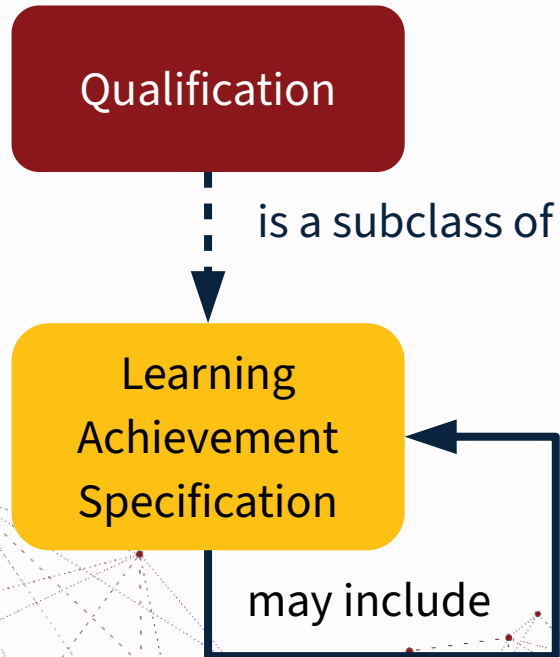

## Limitations:

- Difference in abstract classes, i.e. concepts not matching 1:1
- Class inheritance not straight-forward
- Does not build your converter

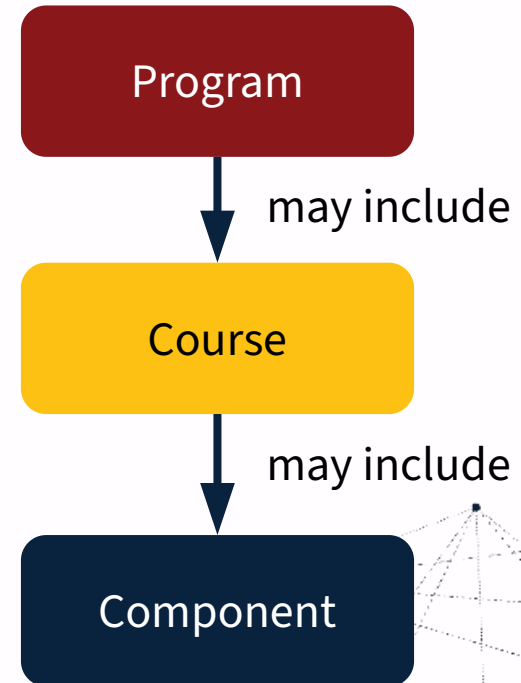

The screenshot displays the SkillData Mappings web application. At the top, there is a navigation bar with the Knowledge INNOVATION Centre logo, a 'View Mappings' tab, a 'New Mapping' button, and a 'Sign In' button. Below the navigation bar, a search bar contains the text 'Learning Opportunity Specification'. To the right of the search bar are two filter buttons: 'Learning Opportunity Instance' and 'Education Provider'. A 'Collapse All / Expand All' link is also present. The main content area is divided into two columns. The left column lists properties: 'entitles to' and 'entry requirement'. The right column shows the details for the selected property, 'entitles to'. It is categorized as 'Identical' and shows a mapping from 'ELM (3.2)' to 'entitles to'. The definition is 'Rights (such as which the person may acquire as a result of acquiring the learning outcomes)'. The relevant class is 'elm:LearningAchievementSpecification' and the expected value type is 'elm:LearningEntitlementSpecification'. Below this, there is a 'Similar' section showing a mapping from 'OOAPI - program (v5)' to 'qualificationAwarded'. The definition is 'None', the relevant class is empty, and the expected value type is empty. At the bottom, there is an 'Aggregated' section showing a mapping from 'OOAPI - course (v5)' to 'enrollment'. The definition is 'The extra information that is provided for enrollment', the relevant class is empty, and the expected value type is 'array'.

## ELM

## OOAPI

- Learning outcomes
  - ELM: summary, ESCO and other frameworks/classification
  - OOAPI, OCCAPI: array of textual descriptions
  - DEQAR: summary & ESCO
  - Edu-API: intended learning outcomes not included in standard spec
- Qualifications frameworks (QF) and level
  - ELM: native use of European Qualifications Framework (EQF)
  - OOAPI: refers to Dutch national QF and EQF together
  - Edu-API: “graduate”, “undergraduate”, “doctoral” – plus “ext:...”
  - DEQAR: native use of Bologna/EHEA QF (“short cycle”, “first cycle”, “second cycle”, “third cycle”) plus “other”

# What's next

- **Consultation:** review our **draft specifications** and share your feedback
- **And:** tell us which **quality indicators** are the most relevant to you
- **Next:** working on data **converters and aggregators**
- **Later** this year: expose your own course catalogue in our **pilot platform**

QualityLink

THANK YOU FOR  
YOUR ATTENTION!

## Short description of QualityLink

QualityLink aims to address all stakeholders' needs by furnishing them with all relevant information about courses and micro-credentials from a diversity of sources to improve recognition decisions and allow learners to follow flexible learning pathways. To make sure that the standards are of high quality and have ownership in the community, the consortium will create a Standards Consultation Board – a group of higher education interoperability experts from across different countries. Through creating open standards and collaboration, the project aims to establish the infrastructure for aggregating quality information from a wide range of sources.
